

Mohammed ANAS P

MERN Stack Developer

Malappuram, Kerala, India | +91 8075707760 | anaspalakkalwork@gmail.com
linkedin.com/in/anaspalakkal | github.com/anaspalakkal

PROFESSIONAL SUMMARY

MERN Stack Developer with internship experience building full-stack web applications using MongoDB, Express.js, React, and Node.js. Comfortable working across the stack, from backend authentication and security to admin panel development. Quick learner and collaborative team contributor.

EXPERIENCE

MERN Stack Developer Intern | Zil Money, Manjeri

Jan 2026 – Apr 2026

- Developed user authentication and security features for the backend of a full-stack expense tracker application.
- Built the complete admin panel, frontend and backend, for the same application as part of a team project.
- Gained real-world experience at a financial technology company, collaborating within a cross-functional team.

React Development Intern | Softroniics, Calicut

May 2025

- Completed a front-end development internship focused on building interactive user interfaces with React.
- Gained practical experience creating reusable components, managing application state, and designing clean, user-friendly interfaces.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js

Backend: Node.js, Express.js, MongoDB

Tools & Platforms: Git, GitHub, Postman, REST APIs

Other: AI-assisted development tools and workflows

PROJECTS

Foo D Valley | Food Recipe Full-Stack Web Application

Technologies: React, PostgreSQL, Cloudinary, JWT

- Developed a full-stack recipe-sharing platform enabling users to search a global recipe database.
- Implemented user accounts allowing members to upload, manage, and save their own recipes.
- Built social features including following other users and saving favorite recipes.
- Used JWT for authentication and Cloudinary for image storage and management.

Green Pouch | Financial & Expense Tracker Application (Team Project)

Technologies: Flutter, Dart, Node.js, Express.js, MongoDB, MongoDB Atlas, Firebase FCM, JWT, Socket.IO, Postman, GitHub, Render

- Owned full-stack development of the admin panel (frontend and backend) for a multi-user expense tracking application.
- Implemented user authentication and security features across the application.
- Enabled core features including expense tracking, savings goals, financial analytics, and support for multiple user accounts.
- Integrated real-time updates with Socket.IO and push notifications via Firebase FCM.

EDUCATION

B.Voc Mobile Application Development | Calicut University – Amal College of Advanced Studies, Nilambur

2023 – 2026

Higher Secondary – Computer Humanities | GBHSS Malappuram

2021 – 2023

CERTIFICATIONS

Application Development Internship Certificate — Zil Money | May 2026

Completed full-stack development work on a MERN-based expense tracker application, including user authentication and security on the backend, and full-stack development of the admin panel.

React.js Certification — Softroniics | May 2025

Hands-on internship covering components, state management, hooks, and routing.
